DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/27/2009 has been entered.

Specification

2. The disclosure is objected to because of the following informalities: On page 5 of the specification (filed 5/24/2006), line 3, it reads "concentration of 6% to 63%...". However, it is unclear what units the percent nitric acid is in (i.e. normality, molarity, weight percent, etc.), or whether there is a conventional term of measurement used in the art to for concentration of acids.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 8 and 10-13 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 8 contains the limitation "...having a nitric acid

Art Unit: 1792

concentration of 6-63% to grow...". However, as mentioned above, it is unclear what units the percent nitric acid is in (i.e. normality, molarity, weight percent, etc.), nor does it teach what terms of measurement are used in the specification. Claims 10-13 fail to cure the deficiencies of claim 8 and are likewise rejected.
